

Amendment to the Specification

The Paragraph beginning at Page 10, lines 22-27, is to be amended as follows:

In its preferred form, the netpage system relies on the production of, and human interaction with, netpages. These are pages of text, graphics and images printed on ordinary paper, but which work like interactive web pages. Information is encoded on each page using ink which is substantially invisible to the unaided human eye. The ink, however, and thereby the coded data, can be sensed by an optically imaging pen (netpage pen 101) and transmitted to the netpage system.
